
ZONATED QUANTIFICATION OF STEATOSIS FOR PHARMACOKINETICS SIMULATIONS

Lars Ole Schwen

Joint work with

Uta Dahmen, Olaf Dirsch, Felix Gremse, André Homeyer, Fabian Kiessling,
Markus Krauss, Lars Küpfer, Christoph Niederalt, Tobias Preusser, Andrea Schenk,
Arne Schenk, Michael Schwier

20. Chirurgische Forschungstage

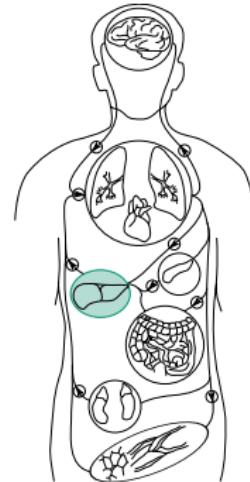

Systembiologie der (Fett-)Leber und Implikationen für chirurgische Forschung
Magdeburg, 2016-09-09

1. Introduction

Pharmacokinetics Simulations

- different organs
- compounds in blood
- model using ordinary differential equations (ODEs)
 - blood flow
 - exchange
 - metabolism
- here: focus on liver

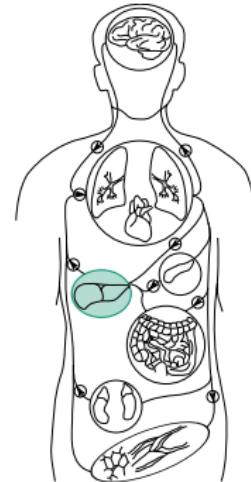

adapted from (CC-BY-SA 3.0)

Challenge:

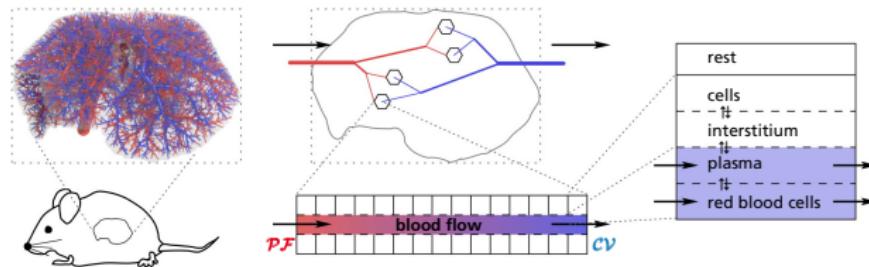

classical 'well stirred' models
cannot represent heterogeneity,
e.g., steatosis

[Zonated quantification of steatosis in an entire mouse liver: *Comput Biol Med* 73:108–118, 2016.]

2. Methods

Spatially Resolved PK Model

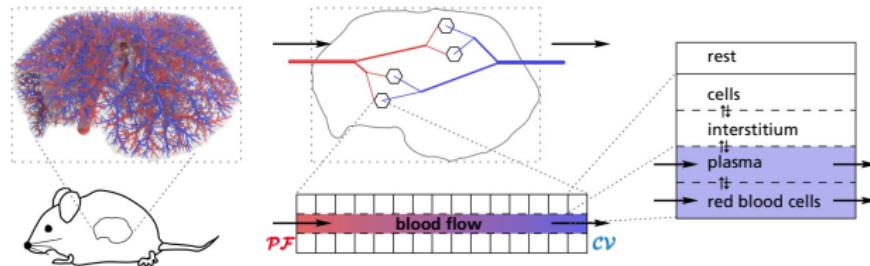

- mechanistic spatially resolved pharmacokinetics model

[Representative sinusoids for hepatic four-scale pharmacokinetics simulations. PLOS ONE, 10(7):e0133653, 2015.]

2. Methods

Spatially Resolved PK Model

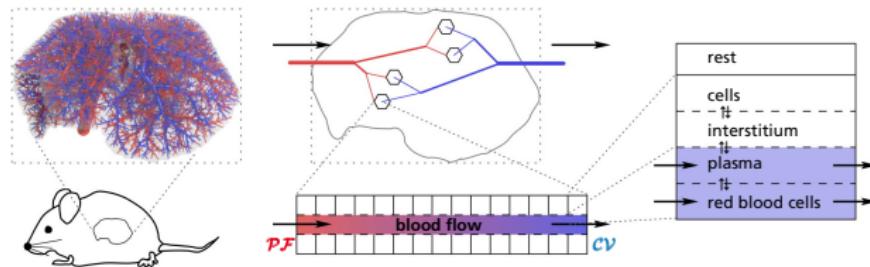

- mechanistic spatially resolved pharmacokinetics model
- four spatial scales
 - body
 - organ
 - sinusoid
 - cellular

[Representative sinusoids for hepatic four-scale pharmacokinetics simulations. PLOS ONE, 10(7):e0133653, 2015.]

2. Methods

Spatially Resolved PK Model

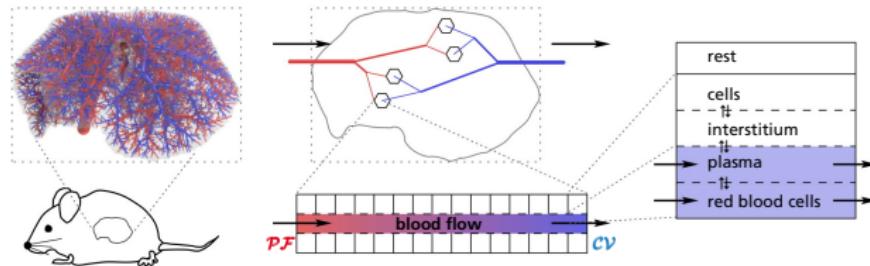

- mechanistic spatially resolved pharmacokinetics model
- four spatial scales \Rightarrow reflect zonation and organ-scale heterogeneity
 - body
 - organ
 - sinusoid
 - cellular

[Representative sinusoids for hepatic four-scale pharmacokinetics simulations. PLOS ONE, 10(7):e0133653, 2015.]

2. Methods

Spatially Resolved PK Model

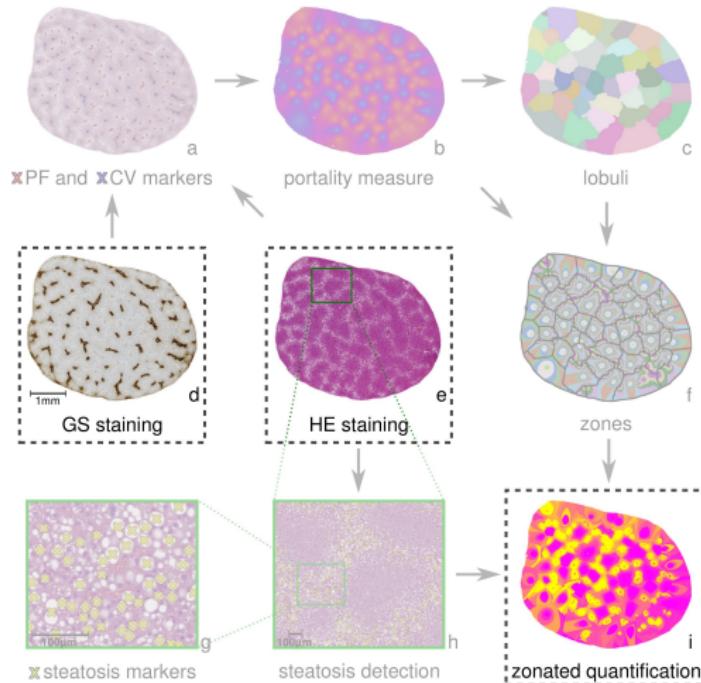

- mechanistic spatially resolved pharmacokinetics model
- four spatial scales \Rightarrow reflect zonation and organ-scale heterogeneity
 - body
 - organ
 - sinusoid
 - cellular
- parameterized partial differential equations (PDEs)

[*Representative sinusoids for hepatic four-scale pharmacokinetics simulations*. PLOS ONE, 10(7):e0133653, 2015.]

2. Methods

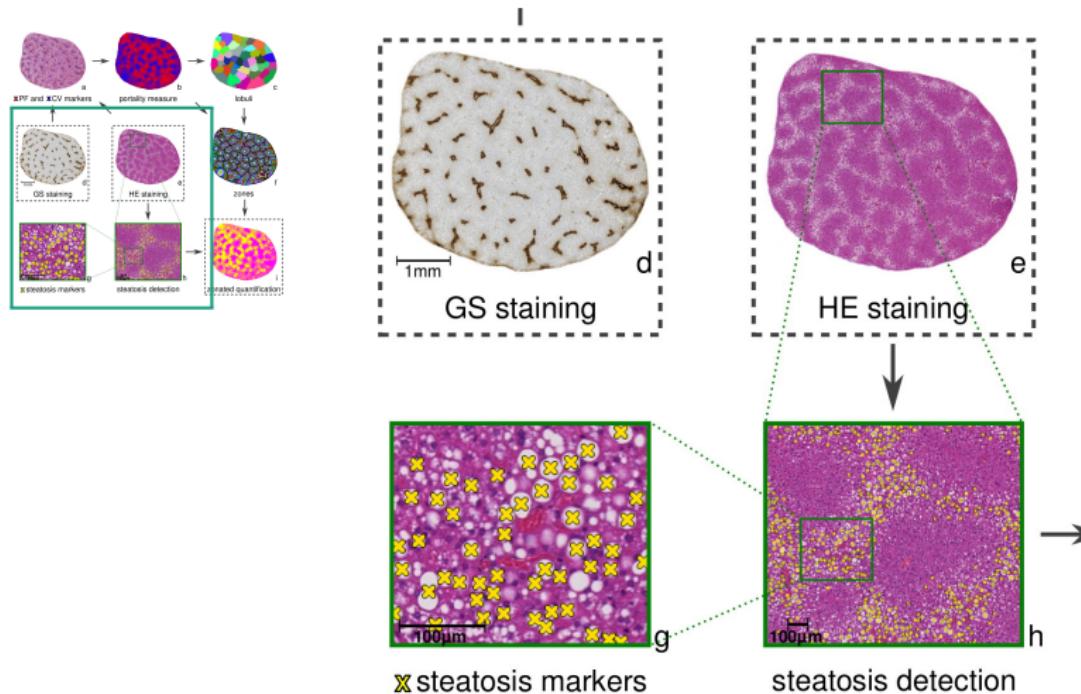

Heterogeneity Quantification from Histo Images

[Zonated quantification of steatosis in an entire mouse liver. Comput Biol Med 73:108–118, 2016.]

2. Methods

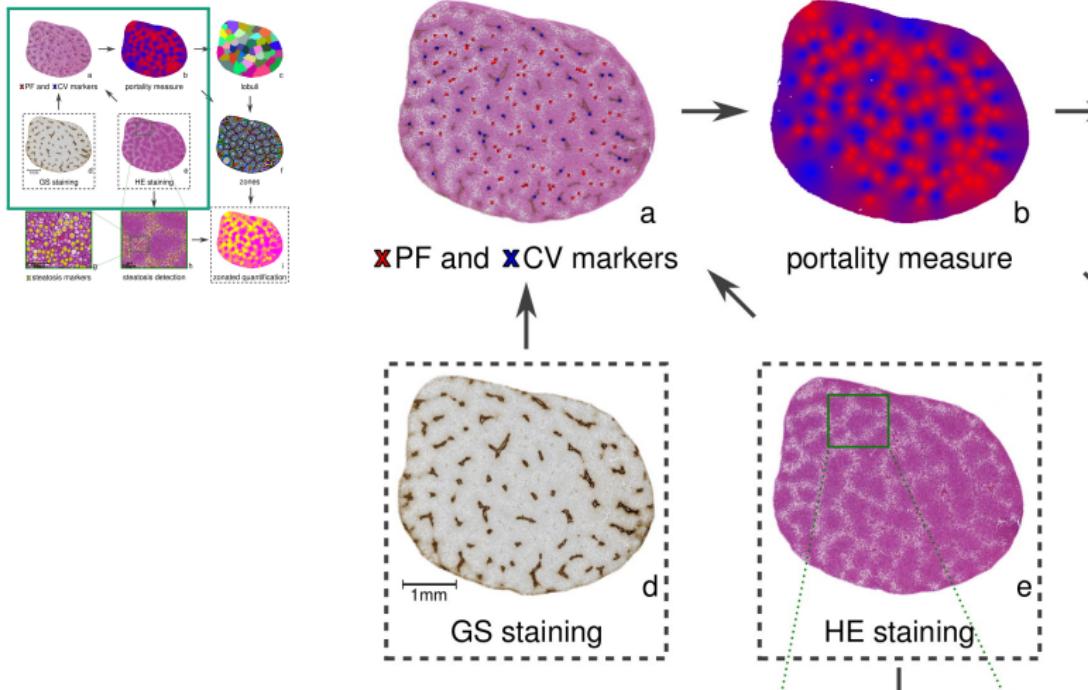

Heterogeneity Quantification from Histo Images

[Zonated quantification of steatosis in an entire mouse liver. Comput Biol Med 73:108–118, 2016.]

2. Methods

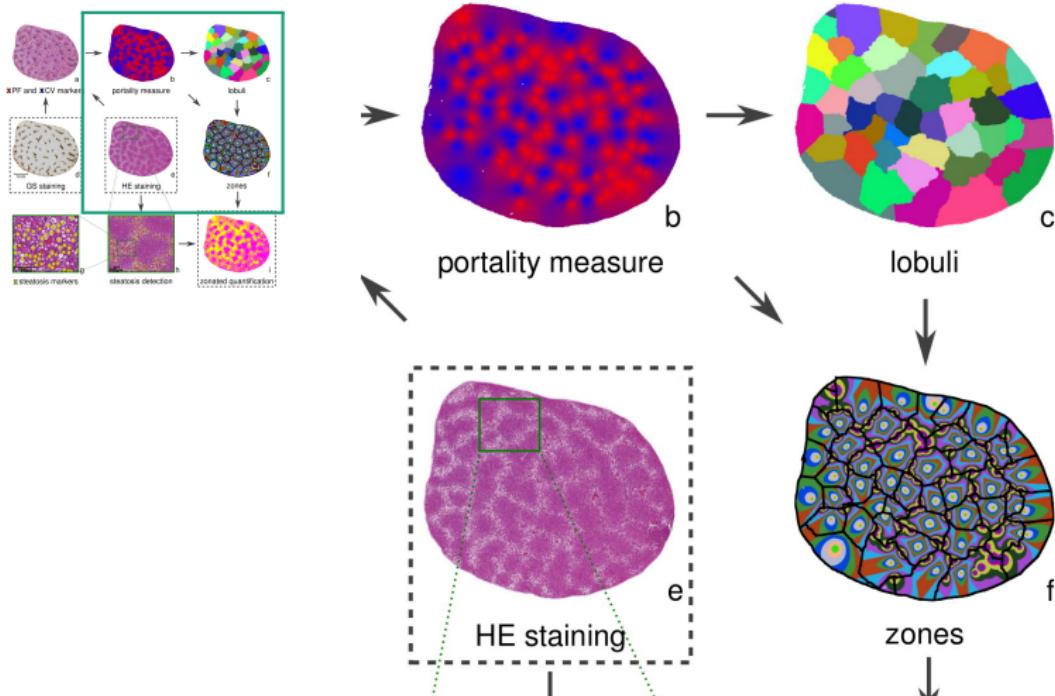

Heterogeneity Quantification from Histo Images

[Zonated quantification of steatosis in an entire mouse liver. Comput Biol Med 73:108–118, 2016.]

2. Methods

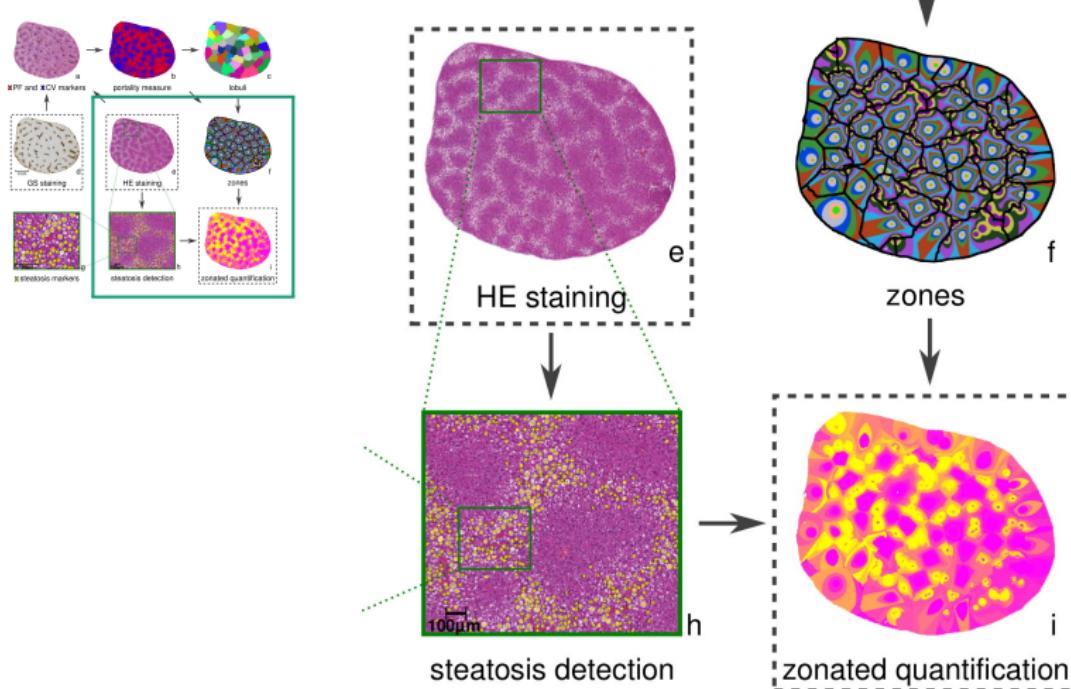

Heterogeneity Quantification from Histo Images

[Zonated quantification of steatosis in an entire mouse liver. Comput Biol Med 73:108–118, 2016.]

2. Methods

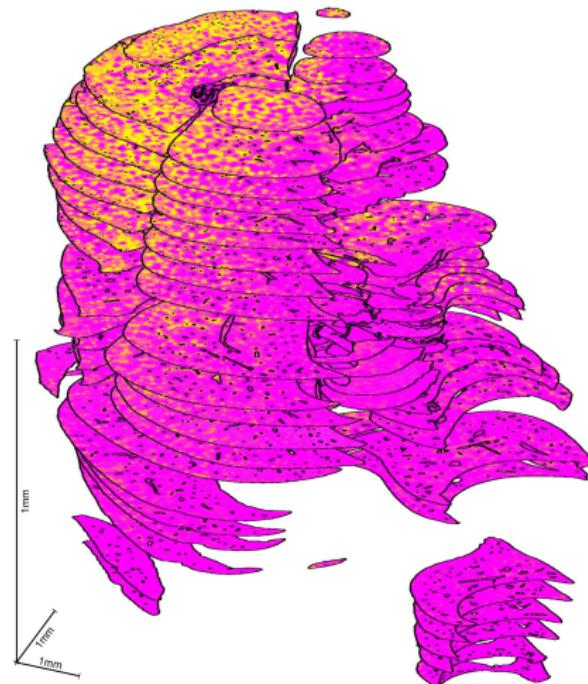

Heterogeneity Quantification from Histo Images

[Zonated quantification of steatosis in an entire mouse liver. Comput Biol Med 73:108–118, 2016.]

2. Methods

Heterogeneity Quantification: Result

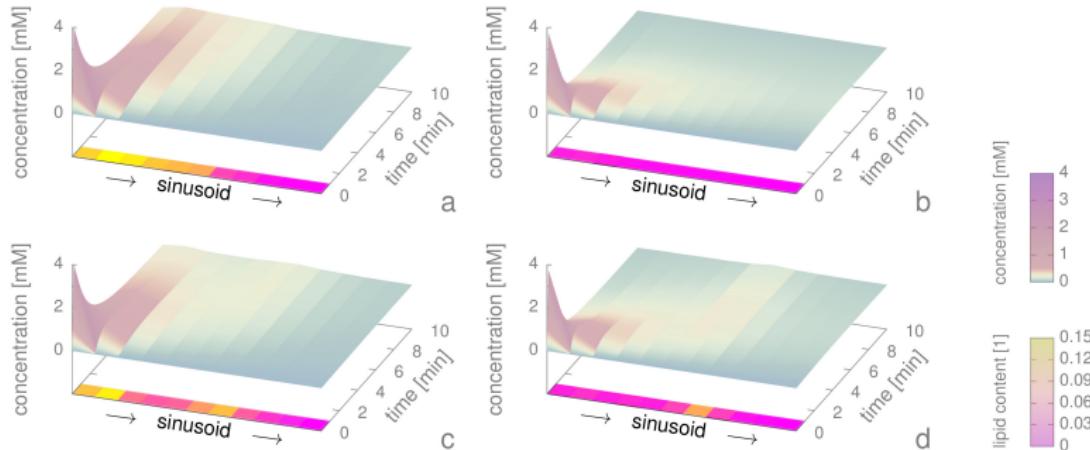

[Zonated quantification of steatosis in an entire mouse liver. Comput Biol Med 73:108–118, 2016.]

3. Results

Example Simulation Results

Different 'representative' steatosis patterns

↔ cellular concentration of dextromethorphan

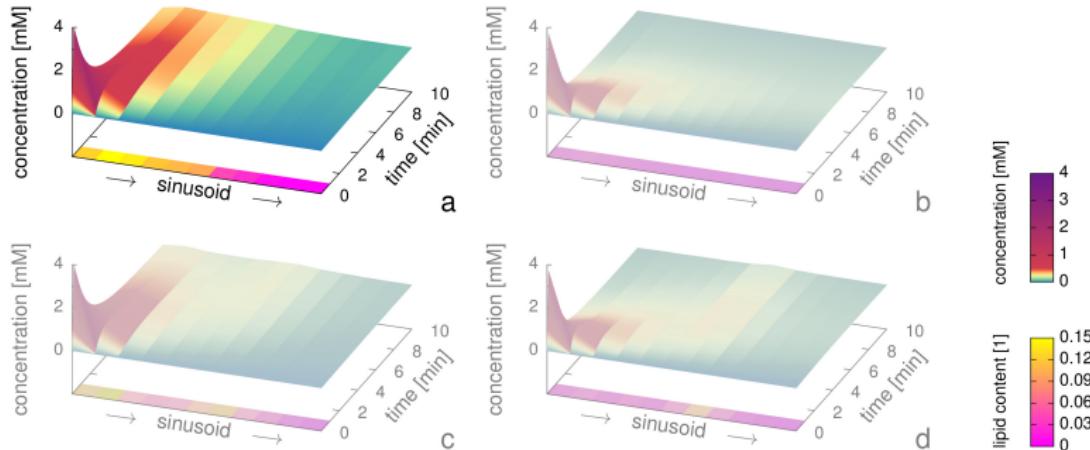

[Representative sinusoids for hepatic four-scale pharmacokinetics simulations. PLOS ONE, 10(7):e0133653, 2015.]

3. Results

Example Simulation Results

Different 'representative' steatosis patterns
↔ cellular concentration of dextromethorphan

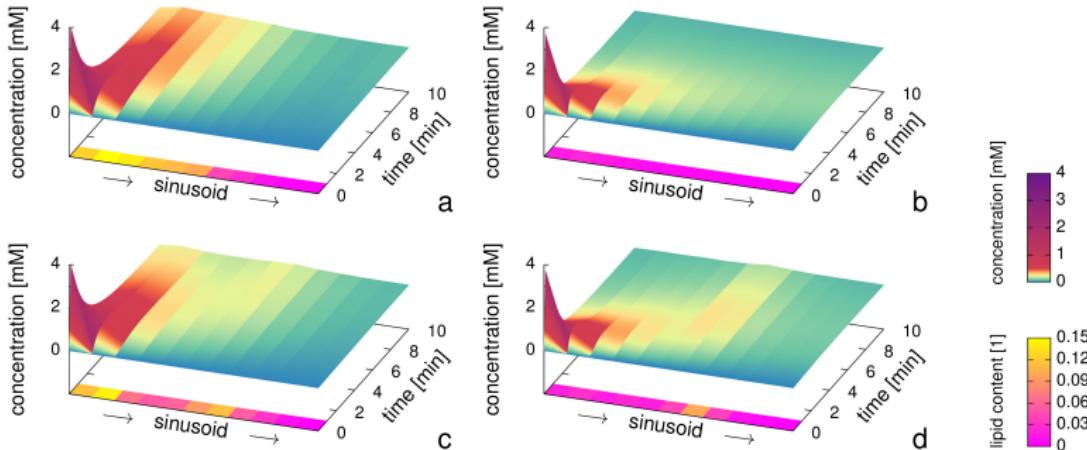

[Representative sinusoids for hepatic four-scale pharmacokinetics simulations. PLOS ONE, 10(7):e0133653, 2015.]

3. Results

Example Simulation Results

Different 'representative' steatosis patterns
↔ cellular concentration of dextromethorphan

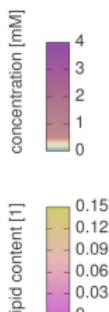

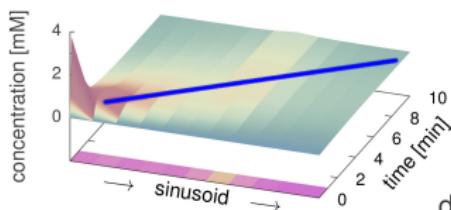

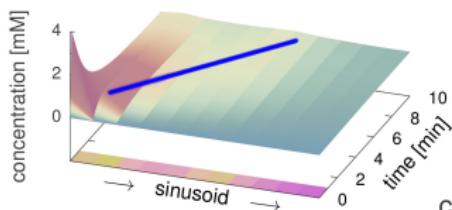

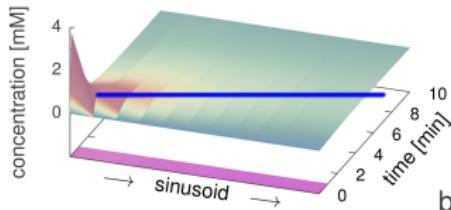

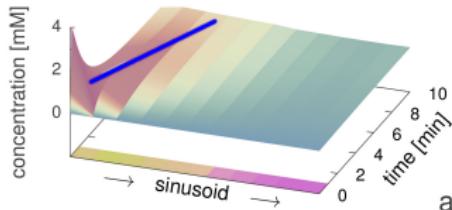

[Representative sinusoids for hepatic four-scale pharmacokinetics simulations. PLOS ONE, 10(7):e0133653, 2015.]

3. Results

Example Simulation Results

Different 'representative' steatosis patterns
↔ cellular concentration of dextromethorphan

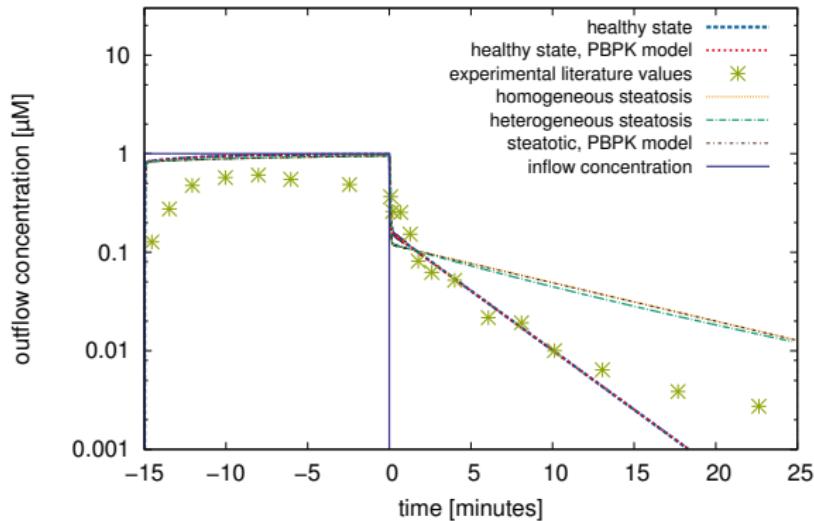

↔ different apparent velocity of peak (\neq flow velocity!)

[*Representative sinusoids for hepatic four-scale pharmacokinetics simulations*. PLOS ONE, 10(7):e0133653, 2015.]

3. Results

First Validation and Model Prediction: Spiramycin

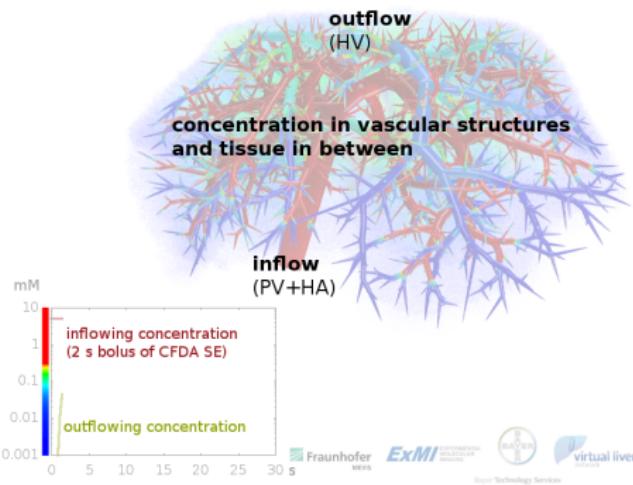

- isolated perfused mouse liver
- earlier continuum-based PK model variant

[*Spatio-Temporal Simulation of First Pass Drug Perfusion in the Liver* PLOS Comp Biol, 10(3):e1003499, 2014]

3. Results

Further Simulation Results

First-pass perfusion of the tracer CFDA-SE
(carboxyfluorescein diacetate succinimidyl ester)

→ Video

[*Spatio-Temporal Simulation of First Pass Drug Perfusion in the Liver* PLOS Comp Biol, 10(3):e1003499, 2014]

4. Perspective

Further Applications

- other species: human models

4. Perspective

Further Applications

- other species: human models
- other relevant compounds

4. Perspective

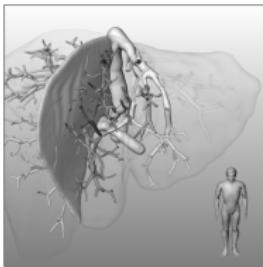

Further Applications

- other species: human models
- other relevant compounds
- other diseases

4. Perspective

Further Applications

- other species: human models
- other relevant compounds
- other diseases
- post-surgery conditions

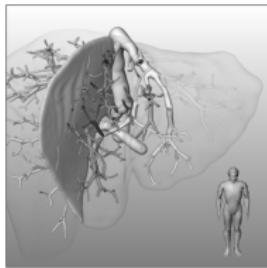

Andrea Schenk

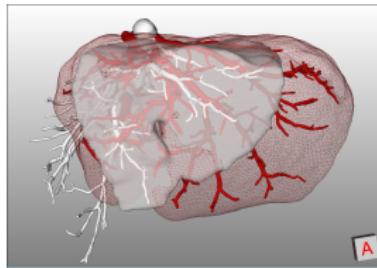

4. Perspective

Further Applications

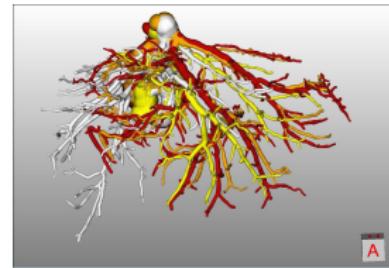

- other species: human models
- other relevant compounds
- other diseases
- post-surgery conditions
- time-dependent input parameters (\Leftarrow progression/regeneration)

Andrea Schenk
